Rail Car Drivers Enrichment Details

Rail Car Driver (SurfaceSAM) Details

Driver Summary

Field	Value
Level	High
Justification	The supplied INF clearly identifies the firmware component, resource GUID, binary, version metadata, and DriverVer date. The Microsoft Update Catalog contains an exact-version entry for 10.401.139.0 and states its release month and Windows applicability, although it does not provide specific fixes. No previous- or latest-version fallback was used, and the unrelated Intel Management Engine information was not treated as evidence for this package. Category mapping used exact SAM and UEFI driverTag matches, followed by a relevance check against the INF and each selected sub-category's stated scope.

Driver Details

Field	Value
Driver Name	SurfaceSAM
Driver Class Name	Firmware
Driver Class Guid	{f2e7dd72-6468-4e36-b6f1-6488f42c1b52}
Driver SC Item Number	5551121
Driver Model	
Driver Provider	%Provider%
Driver Release Date	05/19/2026
Driver Release Version	10.401.139.0

Extracted Driver Details

Rail Car Drivers Enrichment Details

Driver Package Name: Surface Firmware Driver Update (SurfaceSAM)
Version: 10.401.139.0
Release Date: 05/18/2026 (Microsoft Update Catalog listing); INF DriverVer date is 05/19/2026

Driver Component Details

- Surface System Aggregator firmware
- UEFI firmware resource {9490CA71-6A2C-498B-8D5B-15943CA084B8}
- SurfaceSAM_10.401.139.bin firmware payload
- FirmwareId, FirmwareVersion, and FirmwareFilename registry metadata

Feature Keywords

- Surface System Aggregator
- Surface Aggregator Module
- UEFI firmware resource
- firmware update package
- firmware identity and version reporting
- Windows Driver Store staging

Associated Tags

- SAM
- UEFI

Key Components

- Surface System Aggregator firmware, identified by the INF description
- UEFI resource identified by firmware ID {9490CA71-6A2C-498B-8D5B-15943CA084B8}
- SurfaceSAM_10.401.139.bin, the firmware payload copied to the Driver Store
- FirmwareId registry value containing the targeted resource identifier
- FirmwareVersion registry value containing 0x0A01918B
- FirmwareFilename registry value pointing to the staged binary
- Null function driver service entry; the INF declares no functional driver service

Key Functionalities

- Packages and stages the Surface System Aggregator firmware binary for the identified UEFI resource.
- Registers the firmware resource identifier, firmware version, and payload filename for servicing and version reporting.
- Provides an exact-version Surface firmware update package listed in the Microsoft Update Catalog for applicable Windows 11 releases.
- No specific behavioral fix or feature change is stated in the available exact-version catalog description.

Impact Details

- Directly targets the Surface System Aggregator firmware resource identified by the INF.

Rail Car Drivers Enrichment Details

> • May affect staging and servicing of the specified firmware payload through Windows firmware-driver mechanisms.
> • May affect firmware version and identity reporting through the INF-registered FirmwareId, FirmwareVersion, and FirmwareFilename values.
> • The Microsoft Update Catalog lists Windows 11 Client version 22H2 and later as applicable; the INF targets NTamd64 Windows 10.0 build 17134 and later.
> • No specific battery, thermal, security, peripheral, performance, or user-experience improvement is stated in the exact-version catalog description or INF.

Major Components Functionalities

The package is the Surface System Aggregator firmware update version 10.401.139.0, confirmed by the exact-version Microsoft Update Catalog entry and the supplied INFDescriptionData. The INF identifies the UEFI resource by GUID, stages SurfaceSAM_10.401.139.bin in the Driver Store, and registers its firmware ID, version, and filename. The catalog describes the matching package as a Surface Firmware driver update released in May 2026 and lists Windows 11 Client version 22H2 and later as applicable. The catalog date is May 18, 2026, while the INF DriverVer date is May 19, 2026. The catalog does not state specific fixes or describe behavior beyond the firmware package release and applicability. No previous- or latest-version fallback was used, and no specific Surface SKU is asserted because neither the INF nor the catalog entry identifies one.

Description Text

The supplied INFDescriptionData was semantically analyzed and identifies a Microsoft Surface Firmware-class package named Surface System Aggregator. The Microsoft Update Catalog lists the exact version 10.401.139.0 as “Surface Firmware Driver Update,” released in May 2026; the catalog records May 18, while the INF DriverVer date is May 19, 2026. The INF targets the UEFI resource {9490CA71-6A2C-498B-8D5B-15943CA084B8}, stages SurfaceSAM_10.401.139.bin in the Driver Store, and records the firmware identifier, version, and filename. The catalog lists Windows 11 Client version 22H2 and later, including applicability entries for 24H2 and 25H2; it does not name specific Surface models, so none are inferred. The exact-version catalog description provides package and applicability details but no component-specific fixes or functional change list. The provided Intel Management Engine pages concern a different driver family and were not used as a version fallback; no previous- or latest-version fallback was needed because an exact-version catalog entry was found.
